

Economics 4848-003: Applied Econometrics

Spring 2019

T/Th 9:30 AM – 10:45 AM

Room: HUMN 1B45

Class Website through Desire2Learn (D2L)

No Class: March 26 - 28 (Spring Break)

Professor Francisca Antman

Office: Economics 222

Office Hours: T/Th 11AM - 12:00PM and by appointment

Phone: (303) 492-8872

Email: francisca.antman@colorado.edu (preferred method of contact)

Course Description & Objectives

This course is designed as an introduction to the practice of applied regression analysis with a focus on developing skills in econometric analysis and interpretation to conduct original research in the field. A variety of data sets will be used throughout the course and students will analyze them using STATA, a statistical software package popular for conducting empirical economic research.

Prerequisites: ECON 3070 (Intermediate Micro) and ECON 3818 (Introduction to Statistics), or its equivalent, all passed with a C- or better. This is a hands-on course, suited to students interested in developing practical skills in applied econometrics. As such, we will review concepts such as hypothesis testing, but prior exposure is assumed. Students interested in a more in-depth theoretical presentation of some of the topics covered in this course can find complementary material in ECON 4818.

Textbook: There are no required texts for this course, but the lectures will draw from the course pack developed by Professor Brian C. Cadena, available on the course website. Lectures may also be supplemented with material from *Introductory Econometrics: A Modern Approach* by Jeffrey M. Wooldridge, Cengage Learning 2016. See the course website for links to useful tutorials and online resources for STATA users.

Software: Students are not required to purchase their own copies of STATA, as it is available in campus computer labs. Students who wish to purchase STATA for the convenience of working on their own devices, should purchase through the University Grad Plan to obtain a substantial discount. Note that you should purchase STATA/IC (currently priced at \$45 for a 6 month license), as Small STATA is insufficient for this course.

See details at: <https://www.stata.com/order/new/edu/gradplans/student-pricing/>

Hardware: Students should plan to bring a USB drive to every class meeting to store their work or be familiar with online storing technologies such as Google Drive.

Course Requirements

1. Class participation and attendance are required, including contributing to our class discussions. As per department policy, students who do not attend one of the first three class meetings will

be administratively dropped from the course. Unless otherwise noted in class or on the course website, you are responsible for the material covered in class, so it is in your interest to attend.

Additional Policies

Accommodation for Disabilities

If you qualify for accommodations because of a disability, please submit your accommodation letter from Disability Services to your faculty member in a timely manner so that your needs can be addressed. Disability Services determines accommodations based on documented disabilities in the academic environment. Information on requesting accommodations is located on the [Disability Services website](#). Contact Disability Services at 303-492-8671 or dsinfo@colorado.edu for further assistance. If you have a temporary medical condition or injury, see [Temporary Medical Conditions](#) under the Students tab on the Disability Services website.
