Class Introduction

This class assumes that students have no prior computer programming experience. By the end of the class, the student should have a good concept of programming basics using the Java language and the ability to code complex programs in Java. This class will not make the student an expert programmer in Java, but students will gain enough knowledge to build on if they desire.

Fundamentally, this is a programming class and to learn programming, you should ~~o~~ 

well)

[Eclipse](#) - Java programming environment. Choose Downloads from the left menu.
